NICK SOTIRIADIS

Greek
Age 40

SENIOR PRODUCT DESIGNER

SKILLS, COMPETENCES & PHILOSOPHY

Product Design - UI/UX

Evolving technologies require new approaches and ways to interact with products; new challenges are approached with excitement and anticipation while they are considered opporunities for improvement. User excitement is the driving force of my passion to create intuitive solutions to complex challenges.

Design philosophy

As a designer I draw inspiration by all aspects of life - other people's work, nature, architecture, movies, video games. I believe knowledge should be shared, so I help others any way I can - both in real life and also by providing to the online community of developers.

Different designs for different audiences
Safe design patterns than bleeding-edges
Code should be maintainable
Text should be left aligned
Consistency > pixel-perfect design

Bug-free > more features
Small details matter
Negative space plays a major role
Data-Ink Ratio =~1

WORK EXPERIENCE

PCCW Global
03/2015 - Present
